To the conductor and Musicians:

"Echoes of Solitude" is an intermedia collage artwork combining orchestral music with video footage of an abandoned hospital. It explores the interactivity between image and sound while expressing the blurring of the line between reality and perception in conditions of abandonment and isolation. This piece demands technical precision and a profound emotional engagement with the thematic material.

The piece is divided into seven sections: introduction (A), presentation (B-G), collage (H), confusion (I), diversion (J), layering (K), and focus (L). The piece consists of five hospital rooms and a hallway, each with its own characteristic music and footage, presented in the presentation section.

The synchronisation between the orchestra and video is critical. The conductor will use a click tracker to align with the video.

This composition delves into the emotional landscape of solitude. Musicians are encouraged to explore their instruments' dynamic and expressive range, reflecting the piece's haunting and introspective nature.

It is essential to emphasise phrasing and articulation, especially during transitions and when music interacts with visuals, to create the desired atmosphere.

Silence and space are just as important as the notes themselves. Be mindful of the rests and pauses, as they are integral to creating the piece's atmosphere.

The video is a crucial component of the performance, and musicians must be mindful of the critical visual moments and how they correspond with the musical score.

Transitions aren't always rhythmic; intentional misalignment allows for greater expressive range.
